

MY CUSTOMER-FIRST TOOLKIT

Created by Anurag, Priti, and Avinash – Product Management Collective, Adobe India Career Fest 2025

DAILY CUSTOMER-FIRST HABITS

- **Who exactly is my customer today?**
Be specific: role, persona, job-to-be-done
- **What pain am I solving?**
Look beyond features to real friction
- **How do I know this is true?**
Use data, behavior analysis, customer calls

STRUCTURED PROBLEM SOLVING

Example:

"Why aren't customers adopting Feature X?" → Break into usability/awareness/value → Test each root cause with data

CUSTOMER CENTRICITY MEETS GEN AI

Customer Task	Approach	Gen AI Powered
Understand Needs	Customer Advisory Board, Interviews	Acrobat Studio, Goldmine
Analyze Behavior	Product Usage dashboards	Adobe internal AI tools over product telemetry
Discover Pain Points	Support tickets, Community Forums	Adobe Internal tools to gather insights
Ideate Solutions	Brainstorming sessions	Cursor, Lovable, Google AI Studio for rapid prototyping
Stay Competitive	Competitive benchmarking	Acrobat Studio, Goldmine, ChatGPT, Google Deep Research, Perplexity

DO'S AND DON'TS OF CUSTOMER ENGAGEMENT

Do's:

Listen Actively, Don't Validate Assumptions

Ask open questions, capture insights without bias.

Engage Continuously, Not Just During Escalations

Build relationships proactively, not reactively.

Focus on Outcomes, Not Just Features

Understand customer goals, design for impact.

Don'ts:

Don't Treat Feedback as Data Points Only

Look for patterns and root causes, not isolated comments.

Don't Sell, Solve

Approach conversations with a mindset to help, not pitch.

Don't Assume You Know the Customer

Customer needs evolve—stay curious and keep learning.

WEEKLY REFLECTION SELF CHECK-IN

- 📖 What did I learn about my customer this week?
- 🔄 What changed in their behavior or expectations?
- ✅ Did I validate assumptions using data?

STAY CURIOUS: LEARN & GROW
